

SUMIT RAJ

AI ENGINEER · MACHINE LEARNING · LLMs & NLP · COMPUTER VISION

📍 Dehradun, Uttarakhand | ✉ ahirsumit0145@gmail.com | 🔗 linkedin.com/in/sumit-raj | <> github.com/ahirSUMIT

PROFESSIONAL SUMMARY

Final-year Computer Science Engineering student specializing in Artificial Intelligence, Machine Learning, LLMs, NLP, Prompt Engineering, and Computer Vision. Hands-on builder of AI-powered applications using Python, Flask, the Groq API, OpenCV, and MediaPipe — spanning resume-screening and job-matching systems to real-time gesture recognition. Backed by a strong foundation in Data Structures & Algorithms, REST APIs, and full-stack (MERN) development. Seeking AI Engineer / ML Engineer opportunities to build production-ready, LLM-powered products.

TECHNICAL SKILLS

Languages Python, Java, C++, JavaScript, C
AI / ML Machine Learning, NLP, LLMs, Prompt Engineering, AI Agents, Resume Parsing
Computer Vision OpenCV, MediaPipe
Frameworks Flask, LangChain, Groq API, Pydantic, PyPDF
Web Development React.js, Node.js, Express.js, MongoDB, REST APIs
Tools Git, GitHub, VS Code, Postman

EXPERIENCE

Front-End Development Intern — Cognifyz Technologies Jun 2025 – Jul 2025

- Built and shipped responsive, cross-browser UI components, integrating them with backend REST APIs to support key user-facing workflows.
- Partnered with the engineering team via Git/GitHub on code reviews and version control, while profiling and refining UI performance for a smoother user experience.

PROJECTS

- ▶ **AI Resume Analyzer & Job Recommendation System** — Engineered an end-to-end resume-screening pipeline (Python, Flask, Groq API, NLP) that parses resumes, extracts skills, benchmarks candidates against job descriptions, and generates ATS scores with AI-driven recommendations.
- ▶ **AI Chat Assistant** — Designed a modular LLM-powered chatbot using the Groq API and structured prompt-engineering techniques for reliable, context-aware conversations.
- ▶ **Real-Time Sign Language Recognition** — Built a real-time hand-gesture recognition pipeline with OpenCV and MediaPipe, architected for extension to an LSTM-based dynamic-gesture model.
- ▶ **Blockchain-Based Secure Voting System (Capstone Project)** — Developed a decentralized voting system with secure vote validation to ensure tamper-resistant, transparent elections.
- ▶ **Lost & Found Portal — MERN Stack** — Built a full-stack platform with React, Node.js, Express, and MongoDB, covering end-to-end CRUD workflows and REST API integration.

EDUCATION

B.Tech, Computer Science & Engineering 2023 – 2027 (Expected)
Tula's Institute, Dehradun — affiliated with Veer Madho Singh Bhandari Uttarakhand Technical University (VMSBUTU)

CERTIFICATIONS & STRENGTHS

Certifications Artificial Intelligence & Machine Learning · Python Programming · MERN Stack Development
Core Strengths Problem Solving · Data Structures & Algorithms · OOP · Team Collaboration · Continuous Learning
